**Seminar describes
research on levee
failure from disasters**

The Delta Science Program, Ecosystem Restoration Program, and Surface Water Ambient Monitoring Program will present a seminar May 19 in Sacramento, titled "Resilient and Sustainable Delta Infrastructure — Quantifying Risks to Integrated Resources." Emery Roe, senior researcher at University of California, Berkeley, will lead the discussion. More information is [here](#).

**CVFPB meeting will
discuss levees and its
BDCP comments**

The Central Valley Flood Protection Board (CVFPB) will meet May 22 in Sacramento. [Agenda](#) items include a DWR update on the Delta Islands and Levees Feasibility Study, U.S.

Army Corps of Engineers levee inspection results, and the approval to submit CVFPB comments on the Bay Delta Conservation Plan (BDCP) Draft EIR prior to the deadline and authorize the Board President to sign on behalf of the Board.

**UC Davis will hold
Extreme Precipitation
Symposium**

The University of California, Davis will hold the [California Extreme Precipitation Symposium](#) June 24 in Davis. Presentations will focus on extreme precipitation events that can cause serious flooding in California. The symposium's goal is to increase the warning time before a major flood happens and improve predicting the size of floods.
