Mark E. Andersen
Acting Deputy Director
Department of Water Resources

The Department of Water Resources (DWR) is initially approving 839,376 acre-feet (AF) of Table A water for long-term State Water Project (SWP) contractors in 2017. SWP supplies are projected to meet 20 percent of most SWP contractors' requests for Table A water, which totals 4,172,786 AF. Attached is the initial 2017 SWP allocation table.

In addition, DWR received requests for delivery of SWP contractors' allocated carryover water from previous years totaling 628,090 AF (as of October 2016). DWR approves all requested carryover water for delivery in 2017.

This allocation increase is made consistent with the long-term water supply contracts and public policy. DWR's new approval considered several factors including existing storage in SWP conservation reservoirs, SWP operational constraints such as the conditions of the recent Biological Opinions for delta smelt and salmonids, and the longfin smelt incidental take permit, and 2017 contractor demands. DWR may revise allocations if warranted by the year's developing hydrologic and water supply conditions.

Based on this allocation, DWR will use the current long-term SWP contractors' 30 percent schedules to arrive at the new 20 percent schedules, unless contractors submit updated schedules. DWR will send the approved monthly water delivery schedules to the long-term SWP contractors.
